

JUNIOR SAFETY OFFICERS

# October Bulletin

## BE BRIGHT, BE SEEN

The clocks go back soon, which means it will get darker earlier. It can be hard for our eyes to process the changing light, especially for drivers. This means they may not see us.

### How can we make sure we're seen?

- \* Bright colours on our clothes and bags
- \* Fluorescent and reflective material, to be seen easily in day light and night time
- \* Bright reflective keyrings
- \* Carrying a torch or using a light on a phone
- \* Using lights on bicycles

These are just a few ideas.  
See if you can come up with anymore?

## Halloween and Bonfire Night Safety

Halloween and Bonfire Night are nearly here.

Lots of us get dressed up, go to see fireworks, bonfires and use sparklers.

Here's how to keep yourselves safe.

Use a carrot to hold your sparkler

Don't pick up a used sparkler it could still be very hot

Stand well back

Always wear gloves

Never go back to a lit firework

### DID YOU KNOW?

A SPARKLER REACHES 2000 DEGREES CELCIUS.  
THAT'S 20 TIMES HOTTER THAN BOILING WATER.
